Two Ways to Earn Your Master's Degree

The Master of Natural Resources is delivered in two flexible formats:

- **Online** (fully online course delivery)
- **Executive** (hybrid: online plus in-person; cohort-based and accelerated)
- Both are designed for current and aspiring environmental and sustainability professionals looking to take their career to the next level.

MASTER OF NATURAL RESOURCES

PROGRAM	MNR ONLINE
QUALIFICATIONS	Undergraduate degree
SCHEDULE & TIMELINE	Flexible (12-36 months)
PROGRAM BEGINS	Semester of choice (3 times/year)
LOCATION	Online + international trip
GLOBAL STUDY	A 10-day international trip to one or more* destinations. Previous destinations have included Argentina, Brazil, China, Iceland, India, and South Africa.
ENGLISH PROFICIENCY	Yes
COST	\$31,465 (+ books and international airfare)**

PROGRAM	EXECUTIVE MNR (XMNR)
QUALIFICATIONS	Undergraduate degree
SCHEDULE & TIMELINE	12 months (3 semesters); includes 11 weekend meetings (5 on campus + 6 virtually)
PROGRAM BEGINS	January
LOCATION	Washington, D.C. metro area + 6 virtual meetings + international trip

VIRGINIA TECH

Master of Natural Resources (Online)

The MNR (Online) is a 30-credit, virtual, and flexible degree program that prepares students for careers in environmental sustainability. The program combines online coursework and participation in a 10-day, face-to-face Global Study (an international trip) that takes the place of the typical professional graduate degree capstone project. Students interested in more than one Global Study may pursue additional opportunities through the Study Abroad option, to be discussed with a graduate advisor upon admission.

Whether you're about to graduate with your Bachelor's degree, are a recent grad, or have been working for a decade or longer, this flexible interdisciplinary program instills the conceptual and critical thinking skills necessary for lifelong learning and career development. MNR graduates are prepared to succeed on a truly global stage as natural resource, environmental, and sustainability professionals.

COURSES

- **Core courses:** Global Issues in Environmental Sustainability, Leadership Communication for Sustainability Professionals, Constructing Sustainability, Strategies for Sustainability, Sustainability Systems
- **Elective courses in these focus areas:** Biodiversity and Ecosystems, Cities and Urban Systems, Climate Change, Environmental Policy, Sustainable Business, Water and Marine Systems

Executive Master of Natural Resources (XMNR)

The Executive Master of Natural Resources (XMNR) is an accelerated (1 year) graduate degree program that combines the best of online and in-person education in an innovative hybrid and cohort-based curriculum focused on systems learning, leadership, and change. The XMNR is a transformative learning and leadership development experience that educates, inspires, and empowers professionals to address current and emerging challenges in sustainable development, environmental justice, climate resilience, and related topics.

XMNR students learn to make sense of complex environmental and sustainability systems, apply advanced leadership strategies and practices, engage diverse stakeholders in real-world case projects, and improve their overall professional performance to advance their careers. XMNR students typically have demanding full-time jobs, which is why our curriculum is designed to help them improve their performance at work, advance their careers, and have greater impact in the world. Executive-style graduate programs are for anyone who is interested in experiential and peer-to-peer learning focusing on professional and leadership development as related to sustainability systems.

The program is taught as a hybrid of in-person/virtual meetings and online individual and small-group work. Students gather in person 5 times a year for three-day experiential learning weekends, 6 times virtually for two-day meetings, and one 10-day Global Study experience. Meeting with your cohort virtually or in the Washington, D.C. metro area, you'll strengthen your network with access to Virginia Tech's faculty and world-renowned sustainability experts, as well as peers from

across disciplinary and sectoral boundaries. You'll also network with global partners during your Global Study, and apply lessons learned to real-world sustainability projects.

Sustainable Business and Circular Economy

Global Resource Flows and Supply Chains

Urbanization and Sustainable Cities

Biodiversity and Ecosystems

Leadership and Innovation

Communications and Collaboration

Individual Development, Independent Study, and Career Advising*

*Students have the opportunity to focus their studies, specialize, and develop expertise on topics of interest and relevant to their career goals through an Individual Development Process that includes independent study projects and career coaching options.

~30 STUDENTS PER COHORT

AVERAGE AGE: ~40
AGE RANGE: ~25-60

STUDENTS ENGAGE
WITH > 50 FACULTY AND
GUEST FACULTY

Global Study

MNR students participate in a ten-day Global Study experience—a required part of our degree in both programs—to engage with real-world global sustainability challenges.

For **Executive Master of Natural Resources (XMNR)** students, the Global Study destination for each cohort is chosen by the faculty. Previous XMNR Global Study locations have included China, Egypt, India, Mexico, Morocco, South Africa, and Turkey.

Students in the **Master of Natural Resources (Online)** are able to choose from the Global Study options offered while they are degree-seeking in the program. Upcoming 2024 locations, focused on sustainability and ecosystems, include Australia, Fiji, and New Zealand.

Past MNR (Online) locations for Global Study have included Argentina, Bali, Brazil, China, Croatia, Cuba, Estonia, Iceland, India, Ireland, Italy, Finland, Morocco, Turkey, South Africa, and Switzerland.

Those who are interested in emphasizing international experiential learning during their time in the program have an opportunity, if desired, to visit multiple destinations as part of their graduate degree coursework.

INTERCULTURAL COMPETENCE

Understanding similarities and differences between cultures, and how those factors underlie different perspectives, is a key to success for global sustainability professionals. All students undergo a standardized cultural competence test, the Intercultural Development Inventory (IDI), administered by trained faculty members.

Alums

Our graduates live and work all over the world, but they remain closely connected, both in person and online. Here's a small sample of the types of jobs and organizations where you can find our alums.

"What was most valuable for me was the confidence I gained in discussing important and complex sustainability issues. I now have the credentials to speak up and make an impact."

ARSLAN AHMAD

"Throughout my experience, I learned how to step back and see things at a broad level—only then can problems be identified and broken down to achieve a long-term goal."

MIKE BECKNER

"This degree has helped me to build an international work portfolio and is also helpful as I assist in urban renewal programs in my hometown of Detroit. Challenges of sustainability are truly relevant wherever we find ourselves."

MAGGIE STRIZ CALNIN

"They're really teaching you the skills you need to be a leader in your field and to understand decisions that other leaders are making."

VIRGINIA FOSTER

"I was looking to move my career from a mid-level government employee to an executive position. After graduating, a year and a half later I became the executive director of a non-profit."

KATE FRITZ

WHO ARE OUR ALUMS?

- Executive Director, Alliance for the Chesapeake Bay
- Energy and Sustainability Liaison at District of Columbia Public Schools (DCPS)
- Sustainability Consultant, Dominion Energy
- International Trade Policy Leader at USDA Foreign Agricultural Service (FAS)
- Senior Client Engagement Lead at the Global Carbon Capture and Sequestration Institute
- Environmental and Social Specialist at MIGA-World Bank Group
- Conservation Strategy Specialist, Restoring America's Forests at The Nature Conservancy
- Country Director at the Institute for Sustainable Communities
- Sustainability and Environmental Specialist, U.S. Geological Survey
- Senior Product Manager at National Geographic Society
- Utility Programs Manager at project:HOMES
- Deputy Director of Parks and Recreation for the City of Greenville
- National Program Coordinator, U.S. Environmental Protection Agency
- Natural Resource Specialist, U.S. Bureau of Land Management
- USAID Grants Auditor, Macfadden
- Communications Strategist and Science Writer, Duke University
- President, Sustainable Designs LLC
- Site Manager, GE Renewables

Student Resources

Whether it's student advising, career coaching and resume help, financial aid, or veterans' benefits, all MNR students can count on the support of Virginia Tech's faculty and staff.

GREEN CAREERS

As the sustainability field matures, employers look for skills beyond technical expertise. The issues and challenges are complex, global, and interconnected. People working on solving these challenges need to have the ability and the training to think strategically and systemically, and work collaboratively across many disciplines.

CAREER COACHING AND RESUME GUIDANCE

All our graduate students and recent alums have access to personal career coaching. Even if you have a solid grasp of your values and skills, career coaching can help you advance in your career or pivot successfully to a new one.

FINANCIAL AID

Students may qualify for financial aid, usually in the form of student loans. Learn more on our [website](#).

THE VALUE OF A MASTER'S DEGREE

~\$100,000/year average salary of employees in the Environmental, Health, Safety, and Sustainability field*

~\$5,000/year salary boost with graduate degree for employees with <15 years of work experience**

50% of mid-career sustainability professionals have advanced degrees**
